

**Beats iPhone Cases are now available for iPhone 17e**  
*Available in Bedrock Blue and Lime Stone*

CULVER CITY—March 2, 2026—Beats today announced the addition of the Beats iPhone 17e Case with MagSafe in Bedrock Blue and Lime Stone to its existing line of iPhone cases. Designed for the new iPhone 17e, customers can order the two popular colors starting today on [apple.com](https://apple.com) for \$45.

The Beats iPhone 17e Case with MagSafe has undergone extensive testing throughout the design and manufacturing process to help protect iPhone. It is precisely crafted to fit the design of iPhone 17e.

The strong polycarbonate back is complemented by flexible sidewalls to optimize shock absorption, while making the minimalist case thin and light. The outer matte finish reduces signs of scratches, smudges, and fingerprints, while the interior microfiber lining gently reduces surface scratches and abrasion.

The durable case is MagSafe compatible, with built-in magnets that align perfectly with iPhone 17e for an easy attach experience with supported accessories, and efficient wireless charging. The bottom of the case is open to allow for easy swipecability and access to the USB-C port.

Packaging is 100% fiber-based. The wood fibers are 100% recycled or responsibly sourced.<sup>1</sup>
